

Due to frequent requests we have started to make Roller Skate Wheel (RSW) Bump Stops. The bump stops are made from the same high quality polyurethane as our other bump stops and are produced in permanent steel molds. The RSW's have a 2.0" OD and 5/8" ID with two heights available; 1/2" & 1". They are available in 50, 60, 70, 80 & 90 durometers. The RSW's will have a more progressive feel than puck type bump stops.
